KEY TECHNICAL SKILLS

- ArcGIS Pro – Spatial Analysis & Cartography
- ArcGIS Enterprise & ArcGIS Online
- Survey123 & Field Maps
- Experience Builder, Dashboards & Web GIS
- Enterprise Geodatabase & Data Modelling
- Domains, Subtypes & Topology
- QA/QC & Spatial Data Validation
- Python (ArcPy) & ModelBuilder
- SQL (Oracle)
- AutoCAD Map & CAD-to-GIS
- Environmental Constraints & LULC
- FME Form & FME Flow

PROFESSIONAL MEMBERSHIPS

- Fellow (FRGS), Royal Geographical Society, UK
- Chartered Geographer (CGeog) – Application approved

PROFESSIONAL SUMMARY

GIS professional with 14+ years of experience delivering geospatial solutions across environmental, infrastructure, utilities, planning, landscape and engineering programmes for UK and India clients.

Strong hands-on expertise across the Esri ArcGIS platform, including ArcGIS Pro, ArcGIS Enterprise, ArcGIS Portal, ArcGIS Online, Experience Builder, Dashboards, Survey123 and Field Maps.

Experienced in enterprise GIS, environmental mapping, spatial analysis, geospatial data modelling, QA/QC, GIS governance, field data collection, reporting, workflow automation and technical delivery.

Currently supporting major UK environmental and infrastructure programmes at Arcadis, delivering Environmental Constraints Mapping, Landscape Designation Figures, Biodiversity Net Gain (BNG) support, Cultural Heritage GIS and environmental datasets for multidisciplinary engineering and environmental teams.

Strong experience in designing and maintaining ArcGIS Enterprise workflows, processing and validating Survey123 field data, developing web GIS applications and dashboards, and automating GIS processes using Python/ArcPy and FME.

Previous experience includes large-scale utility GIS programmes involving team coordination, technical QA/QC, data validation, workflow standardisation and vendor coordination, including GIS deliverable reviews and issue resolution with Ramtech on the UPPCL project.

Experienced in collaborating with project managers, engineers, ecologists, planners, landscape architects, environmental consultants, vendors and client stakeholders to deliver technically robust GIS solutions within defined quality and project requirements.

DIGITAL TRANSFORMATION & INNOVATION

- Recognised among the Top 10 Learners globally in the Upskilling Programme 2024, hosted by the organisation upskilling programme.
- Recognised for award-winning urban StoryMap development (Esri India User Conference 2025).
- Paper selected for the Paper Presentation Session at Esri India User Conference 2026 and successfully presented on GIS-based decision support for municipal waste management.
- Knowledge of web application development using Django, JavaScript, React and PostgreSQL

CERTIFICATIONS

- CERTIFICATIONS
- ArcGIS Online Administration Associate 2026 (EAOA_2026)
- Esri ArcGIS Pro Foundation
- NPTEL GIS Certification
- Oracle Database 12C
- FME Form & FME Flow Training
- Python & GitHub – Citizen Development Program (Top 10 Performer)

SECTOR EXPERIENCE

- Cultural Heritage GIS mapping
- Environmental Constraints Mapping
- Landscape Designation Figures
- Biodiversity Net Gain (BNG) Support
- Utility Network & Electrical GIS
- Irrigation & Hydrology Mapping

EDUCATION

PGDGI – Geoinformatics
IGNOU | Currently Pursuing

B.A. Economics
YCMOU, Nashik | 2003 | 68%

LANGUAGES

- English
- Hindi
- Marathi

PROFESSIONAL EXPERIENCE

Arcadis Consulting India Pvt Ltd **May 2022 – Present**
GIS Consultant

Delivering GIS solutions for major UK environmental and infrastructure programmes within multidisciplinary engineering and environmental teams.

Environmental & Infrastructure GIS Delivery

- Deliver GIS solutions for UK infrastructure, environmental assessment, planning and permitting programmes.
- Produce Environmental Constraints Mapping and spatial datasets supporting infrastructure planning and design.
- Develop GIS figures and datasets for landscape, ecology, cultural heritage and environmental disciplines.
- Support Biodiversity Net Gain (BNG) through data preparation, topology validation, spatial analysis and area calculations.
- Prepare spatial data for environmental reporting, technical assessments and project deliverables.
- Collaborate with ecologists, planners, landscape architects, engineers, environmental consultants and project managers to translate requirements into practical GIS deliverables.

ArcGIS Enterprise & Web GIS

- Create web maps, feature layers, services, Experience Builder applications and Dashboards for project monitoring and reporting.
- Support enterprise GIS publishing, information sharing, standards.

Survey123, Field Data & Reporting

- Configure Survey123 forms with conditional logic, validation and spatial capture.
- Perform Survey123 QA/QC, spatial validation, data cleaning and reporting.
- Develop dashboards and Smart Atlas from survey data.

GIS Data Management & QA/QC

- Design and maintain geodatabases, feature datasets, domains and subtypes.
- Perform topology validation, technical QA/QC, metadata management and deliverable reviews.
- Develop repeatable GIS workflows and templates to improve consistency and efficiency.

Automation & Continuous Improvement

- Create reusable scripts and templates to reduce manual processing and standardise delivery.

Technical Leadership & Collaboration

- Provide technical guidance, mentor junior GIS professionals and support complex GIS delivery.

Major UK Projects:
National Grid OHL Projects; Sizewell C Development; Humber Low Carbon Pipeline; Norwich to Tilbury.

Ceinsys Tech Ltd – Utility GIS Projects
Oct 2017 – Apr 2022
(4 years, 6 months)

Senior GIS Executive

Client: Uttar Pradesh Power Corporation Limited (UPPCL), India.
Central Electricity Supply Utility of Odisha (CESU), India.
Project: Integrated Power Development Scheme (IPDS),
Restructured Accelerated Power Development and Reforms Programme (RAPDRP)

GIS Project & Technical Coordination

- Supported large-scale utility GIS programmes, coordinating GIS production, QA/QC, task delivery and technical issue resolution across project teams.
- Provided technical guidance, conducted team-output reviews, and delivered GIS training and knowledge-sharing sessions.

QA/QC & Technical Leadership

- Led GIS QA/QC for HT/LT electrical network datasets, covering topology, connectivity, attributes, spatial consistency and data completeness.
- Reviewed deliverables against project specifications, coordinated corrective actions, and supported resolution of complex GIS and data-quality issues.
- Standardised GIS validation workflows and quality-control procedures.
- Vendor & Stakeholder Coordination – UPPCL
- Coordinated with Ramtech as a project/vendor stakeholder on GIS deliverables, supporting data validation, quality reviews and resolution of compliance issues.

Enterprise GIS & Automation

- Designed and maintained enterprise geodatabases and data models, enforcing topology and data-integrity standards.
- Published GIS services and web applications through ArcGIS Enterprise Portal and supported enterprise GIS workflows.
- Automated GIS processing and validation using Python, including integration of GIS datasets with SCADA and MDAS systems.

Genesys International Ltd
Feb 2016 – Oct 2017
(1 year, 8 months)

Senior GIS Executive

Client: Krishna Bhagya Jala Nigam Ltd. (Undertaken by Karnataka Govt.)
Project: KBJNL

- Developed GIS datasets and models for canal and irrigation networks.
- Performed parcel mapping and Land Use / Land Cover analysis.
- Processed hydrology datasets and digitised contours.
- Conducted GIS data validation and quality assurance.
- Coordinated with client teams on GIS deliverables and technical requirements.
- Supported project documentation and delivery management.
- Assisted in resolving GIS data and mapping issues during project execution.

ADCC InfoCad Ltd
Oct 2012 – Oct 2015
(3 years and 1 month)

GIS Executive

Client: Maharashtra State Electricity Distribution Co. Ltd
Project: MDS (Managed Data Services) – HT and LT Consumer Survey

- Delivered GIS-based electrical consumer indexing and asset tagging.
- Supported HT and LT electrical network mapping.
- Performed GIS data cleaning, validation and spatial analysis.
- Supported consumer survey data processing and GIS database updates.
- Prepared MIS reports and project documentation.
- Ensured compliance with defined GIS and data-quality requirements.
